

Report on Feedback Collected from Stakeholders, 2020-2021

Feedback from the students, teachers, management (employers), and alumni were taken using online forms covering the syllabus, its transaction and its outcome. In the context of the pandemic, syllabus delivery had encountered problems unfathomed till then. The major issue this year was the digital divide reported by the first three stake holders, they along with the alumni promised to continue providing digital devices to students. Synchronic classes were a concern for many as the network reception and responsibilities at home which is now shared more by the students (like taking care of the siblings or acting as caregivers to the elderly in the absence of hired help) and a request was made to provide recorded classes. Another concern reported was the disruption to cultural and sports activities. Parents also raised concerns about sensitizing students on the responsible use of digital devices. Provisions for providing sanitizers, wash counters etc. was also raised as offline classes for a few batches commenced in January.
