Action taken on the feedback submitted by the stake Holders 2021-2022

Action taken on the feedback submitted by the UG and PG students as well as the Alumni

The teachers don't directly handle the designing of curriculum of the courses offered.

Teachers participate actively in the curriculum and syllabus formulating workshops held by the university as well as informal discussions sharing views from the feedback obtained too.

Students are encouraged to explore on topics within and outside the syllabus to get a broader picture on how the curriculum can help the student to appreciate the need for basic science studies to understand more about the society we live in.

Students divided into groups are encouraged to have discussions on basic topics to inculcate qualities of critical thinking leading to self-study.

Sessions are given to the students on the opportunities for higher studies as well as research.

Giving exposure to the students on basic know-how about research using the research facilities of the department serves as a catalyst for students to take up research as a career too.

Based on the feedback of the alumni the need for any vocational training, apart from the skills developed from the laboratory sessions, will be intimated to the Board of studies as well, as this may enhance the employability of the student in the job market.

Action taken on the feedback submitted by the Teachers

Viewing the positives of the curriculum, the teachers of the department work in unison to get the best from the students, ensuring the holistic development of each student. - The status quo of two different syllabi for the UG batches, though challenging, also give an opportunity to make comparisons and give the best to students. This is done via making sure that similar topics are handled by the same teacher for both the new and old syllabus.

Any suggestion given by any stakeholder is discussed upon during the departmental meetings. Following deliberations necessary action is planned.

The problems of time constraints being raised have been overcome by taking special classes during weekends or via online sessions.

To address the need for vocational training, students are given basic hands-on training in using staple research facilities.
